Congressman Dingley of Maine admits, in a Washington interview, that his State has one liquor saloon to every seven hundred inhabitants.

One of the latest patents issued is for a railway station indicator. The indicator consists of an oval roll inside a glass box that works automatically, either backward or forward, and displays a number of station names.

No Break up the School.

"That is the new school house, is it?" inquired Miss Alice Ray, the "new teacher," as the farmer's plodding little team passed by a little while home standing enroute to the road enclosed in a rather dilapidated fence.

"I did not know the school was so noisy," said poor Alice, wishing heartily that she had turned out as a washerwoman instead of trying to teach the little boys of Brainerd.

"Mr. Turner, I cannot allow you to interfere in the management of my school," take your seat." The youth obeyed without a word, but kept his eye on Moses as if watching for any delinquency.

Then Jim's countenance changed. His lip quivered, he dashed his hand across his eyes clear to the verge of unaltered dimness, and the great lump in his throat seemed to choke him.

"I can read just as well as I can," replied the fellow with a dogged air. "Put it in one of the rules in a reading class to stand up to read."

CONDITION OF THE INDIANS.

Two of the Indians recognized Major Luce and wanted to talk with him, and ask the object of the visit; that they were hard up and had nothing to eat.

Edward Park, teacher at New Germantown, N. J., suffered most excruciating pains in his abdomen for four months.
