Some Interesting Points...

The St. Paul Dispatch on Monday contained an "Observation on Dynamite," which, parties who have read this initial paper, but who have never heard the method by which it is made...

The word dynamite covers the category of explosive which is a giant powder and nitro-glycerine. In its composition, except that cotton is used, it is exactly the same as dynamite.

The fact of the matter is, that the dynamite was discovered by a Scotchman, who was engaged in the search of information, the chemist "Grove" at Scotland, his office chair, and throwing his feet up among a collection of books.

The dynamite was discovered by a Scotchman, who was engaged in the search of information, the chemist "Grove" at Scotland, his office chair, and throwing his feet up among a collection of books.
