Misnaming Things. The experienced huntsman in the woods never wastes time looking for bear in Bear Hollow, nor deer along Deer Creek, nor would he hope to shoot any great number of ducks on Duck Lake, for his experience has taught him that such points are always misnamed, and this lesson holds good with almost everything in life. For instance, in the case of the brands on articles of food, spices and other ground food products, the things branded or labeled "pure", "strictly pure" or "absolutely pure," are without exception the most villainously adulterated. "Tis the wolf in sheep's clothing always.

The most brazen case is that of the Royal Baking Powder. This article is branded and paraded before the people as "absolutely pure" when it contains ammonia. You can smell it in the can and often in the biscuit while hot. What woman would use an ammonia or alum baking

powder if she knew it? They not only destroy the stomach, but ammonia will destroy the complexion. Not'so with Dr. Price's Cream Baking Powder, the only pure cream tartar powder to be obtained, and the only baking powder made by a physician. Dr. Price has devoted a life-time to perfecting this old-fashioned, indispensable article of the culinary art that has stood all the

tests and remained the standard for forty years.
