HOW A PUZZLE WAS SOLVED.

When you want a certain article, you want the best make of that article, don't you?

But how to determine which make is best is what puzzles you, isn't it?

And when the puzzle is solved for you, by authority which cannot be questioned, you are pleased, aren't you?

And you would like to hear of one puzzle that has been solved for the people of the whole world, wouldn't you?

Well, we will tell you about that very puzzle, and its solution.

At the Universal Exposition of 1889 at Paris, France, the best sewing machines of the world, including those of America, were in competition. They were passed upon by a jury composed of the best foreign mechanical experts, two of whom were the head sewing machine manufacturers of France.

The jury, after exhaustive examination and tests, adjudged that the Wheeler & Wilson machines were the best of all, and conferred that company the highest prize offered, the GRAND PRIZE, giving other companies only gold, silver and bronze medals.

The French Government, as a further recognition of superiority, decorated M. Nathaniel Wheeler, president of the company, with the Cross of the Legion of Honor, the most prized honor of France.

That is how the puzzle of the best sewing machine in the world was fully solved by the most competent authority in the world in favor of the No. 8 and No. 12 Wheeler & Wilson machines.

The No. 8, for family use, and the No. 12, for manufacturing use, are the best in the world to-day.

And now, when you want a sewing machine, if you do not get the best, it will be your own fault.

Ask your sewing machine dealer for the No. 8 Wheeler & Wilson machine, and if he does not keep them, write to us for descriptive catalogue, prices and terms.

Agents wanted in all unoccupied territory.

Mrs. J. H. ROBINSON, Fairchild Ave., Santa Cruz, Cal., writes:

"When a girl at school in Keokuk, Ohio, I had a severe attack of brain fever. On my recovery, my hair came out. I partially bald, and, for a long time, I feared I should be permanently so. Friends urged me to use Ayer's Hair Vigor, and, on doing so, my hair

Began to Grow,

and I now have as fine a head of hair as one could wish for, being clothed, however, from blonde to dark brown.

"After a fit of sickness, my hair came out in handfuls. I used it until the use of

Ayer's Hair Vigor

and now my hair is over a yard long and very full and heavy. I have recommended this preparation to others with like good effect."—Mrs. Sidney Carr, 1460 Regina st., Harrisburg, Pa.

"I have used Ayer's Hair Vigor for several years and always obtained satisfactory results. I know it is the best preparation for the hair that is made."—C. T. Arnett, Mammoth Spring, Ark.

Brainerd Dispatch.

INGERSOLL & WIRLAND, Publishers

BRAINERD, MINN.

Baron Bolyrna who was found dead, fai bed in London the other day, had been Belgian Minister at the courts of St. James for more than twenty years.

Coffee is intoxicating if taken in sufficient quantities, though the effects are in its effects from alcoholic stimulants. The nerves may be disturbed in a degree approaching delirium tremens.

George Washington, who died in Savannah, last week, was the great-grandson of Lawrence Washington, a brother of the first president. He was a graduate of the Yale class of '38.

A scheme to prevent runaways is to have a small electric battery in the vehicles with devices running to the horse nostrils. When the animal bolts a press of the button will stop him instantly. It is said to have never failed.

The Berlin Fire Department is experimenting with a novel fire engine. The carriage is constructed entirely of papier-mache, all the different parts, the body, wheels, poles, etc., being finished in the best possible manner.

A process of forming artificial whalebone from animal hair, consisting in subjecting the hair to a softening bath, then to a bath of acetic acid and finally by placing the mass under great pressure has been invented.

A current of electricity does not always kill when it appears to do so. It simply produces an appearance of death, from which the subject in many cases may be restored by the methods of respiration.

A German general has been decorated by the kaiser for firing two shots at an editor and hitting him once. The record would be valuable if it were not for excellence in marksmanship. If the editors of Germany are of the right sort that general will receive some more decorations.

The fate of the Toledo man who died with his head in a noose, because of a fatal slip in his scheme to frighten his wife when she returned from church, ought to serve as a warning to that practical joker. In this instance the penalty of foolhardiness was paid by the right person.

There are at present at British railway stations nearly 3,000 automatic machines which dispense retail for the space they occupy amounting last year to 17,244. For the same year 151 1-2 tons in 6,794,880 packets of chocolate, and 4,347,204 packets of sweets, weighing 153 tons, were sold.

The Indian stone used for testing gold alloy is a velvet black quartz or plain jasper. The metal when rubbed upon the stone leaves a portion on the black surface, and this being tested with a drop of nitric acid indicates to the experienced eye the comparative purity of the alloy by the color.

The danger of placing flower pots on window sills with no sufficient protection from the wind is further shown in a recent fatality in a dreadful manner in Paris. A gentleman was walking in the Rue St. Denis when a flower pot fell to him from a window above, causing fatal injuries.

Citizens of Ellwood, Ind., are taking steps towards securing a pack of blood hounds with which to run down the many thieves who infest the locality, the inmates of which having proved their inefficiency. After a few innocent persons have been mutilated by the savage animals, and the county has paid heavy damages in consequence, the people may conclude that bloodhounds are not so much a luxury, or necessity either, as they have been cracked up to be.

Perhaps the best evidence of an improvement in the general financial situation is the fact that the Elgin Watch company has commenced running its works four days in the week instead of three, as heretofore since the beginning of the panic a year ago. This indicates an increased demand for watches, which could not occur if times were getting better for people do not invest money in watches in hard times.

The chaplain of the Ohio penitentiary has been suspended from his office pending an investigation into his conduct. It is alleged that money sent to him by friends of the convicts for their use was not applied to its purpose, but stuck to his fingers. It is also alleged that this person was unduly intimate with a woman, and that some of the money intended to add to the comforts of the convicts' life went for the purchase of presents for this fair one. It is evident that, if all the charges are true, the chaplain ought to be a member of his convict colony instead of a teacher of it.

The modern American man-of-war is a little world in itself, or perhaps more properly a floating city, with the inhabitants of many trades and professions. Not only is there a doctor to dose you, and a dentist to cure for your spiritual welfare, but many cooks, several carpenters, skilled machinists, electricians, tailors, musicians and barbers. There is at least one clever salesman sold off as ship's writer, which leiber corresponds closely to, the old-fashioned scrivener. It this happens that one can buy almost anything on board ship, from an engrossed copy of a complimentary resolution to a complicated piece of machinery or cabinet work.

Every little while the police arrest a man who has a lot of burglars' tools in his possession, and one naturally wonders where they all come from. It is easy to buy a gun of any description, and the most ingenious citizen might not be ashamed to be seen purchasing the most wicked-looking knife ever made; but who would know where to get a burglar, shot, or a jimmy, or a device for drilling into a safe, or any of the many tools used by the professional burglar in the pursuit of his calling? There probably are places in many large cities where these things are made and sold to the users, but those places are scarce. One in a while the police find such a factory, and then things go hard for the proprietors. It may seem a little strange to learn that most of the tools used in burglaries are made by mechanics who are looked upon as respectable men in the community. When a burglar wants any particular tool made he goes to a mechanic who can do the job, and pays him perhaps five times what it is actually worth for making the tool and keeping still about it.

Nothing to Fish For.

By the way of illustrating how "the women of the South helped along the war," an officer describes in the Grand Rapids Eagle a scene of which he was an amused eye witness. A gang of Sherman's bummers," he says, had captured a plantation on which were many hens and chickens.

They wrung the necks of the chickens, and then proceeded to gather the eggs, all the while laughing at the angry lady of the house. Just then some Confederate cavalry were came down on a charge. The Union boys retreated a short distance, and made hurried preparations to fight.

The woman ran up to the Confederate officer in command, and beckoned that she wished to help whip the Yankees.

"Very," said he. "Get up on the fence and holler at them."

The woman, dead in earnest, mounted the fence, shook her fist, and shouted:

"Oh, you miserable Yankees! You have cleaned out the whole country.

"What's that?" demanded the officer. "Take out the chickens? Then there is nothing to be fighting for."

With that he rode away, leaving the woman on the top of the fence shaking her fist at the Yankees and calling them names."

Talking Swedish.

Sun, six years ago, had noticed that the girls of foreign nationalities who served in her mother's kitchen spoke English in a way somewhat different from the English she was accustomed to hear from her father and mother.

One day her mother said Susy down stairs with an order to the maid not to prepare any soup for dinner. Presently the little girl came back.

"Well?" said her mother. "did you give Mary the order?"

"Yes, mamma. I told her in Swedish."

"Told her in Swedish! Why, child, what did you say?"

"I said to her, 'You needn't make no soup, Mary!'"

His Idea of Genius.

Freddie Van Twiggen had been silent for such a long time that everybody concluded that he must be thinking again. Quite unexpectedly he said:

"A genius is wealthy a very extraordinary person."

"Yes," replied one of Freddie's friends; "there is no doubt of that. By the way, what is your idea of a genius?"

"A genius," said Freddie after some consideration, is a fellow who makes you wonder how such a smaht man can be such an utter chump."

Miss Minnie McKay has returned from her visit with friends in Minneapolis.

Services were held in the school house Wednesday and Thursday evenings, Jan. 31st and Feb. 1st by Rev. Pew.

On Monday evening a lecture on education was given at the school house by Mr. Grant. The attendance was quite general and all were well pleased.

A couple of our young ladies have been on the war path for some time past. On the condition of peace in the future we have concluded not to publish their names nor the circumstances of the affair.

Some weeks ago Miss Pew, the teacher in this place, organized a literary society for the benefit of the larger pupils and the public at large. The attendance thus far has been small, but it is hoped that more will take an interest in their mental development. The society promises to give the public a grand entertainment in the near future.

OCCASIONAL.

Dilemma.

The following is from the Ottawa Free Press of November 7th, which speaks for itself. Tuesday, Nov 7th, 1893, "The Dilemma or the countryman's first visit to New York," was the attraction last night. It is a three act comedy, is bristling over with funny situations, and was put on in a very commendable manner. The artists in their respective characters created no end of amusement and kept the very large audience in hearty laughter throughout. In addition a high class specialty performance was included on the programme, in which Messrs. J. W. Dempsey, E. J. Nedo, F. Wilson and A. Downie, along with Misses Clara Herbert, and Letina appeared. The songs, dancing and other specialties were the best given at any Ottawa audience for some time.

The above comedy and specialty company will appear at the Sleeper Opera House on Thursday evening of next week Feb. 15.

Cheap Rates to California.

The Northern Pacific Railroad Company has put into effect a series of low round-trip rates to California points. Tickets are good until July 15th, 1894, and are good for stop over under certain conditions.

These rates will enable those desiring to do so, to spend the winter in southern California, or to visit the mid-winter fair to be held at San Francisco. This latter event will undoubtedly be second only to the World's Fair and will repay a visit as it will exhibit the resources and capabilities of California.

The Corn Laws.

One of the most famous political struggles in Great Britain was that which culminated about 1846 in the repeal of what were known as the corn laws. Briefly, these were enactments affecting the importation and exportation of grain. When the landed interest first became important, several hundred years ago, the proprietors conceived it would be to their advantage to restrict the market for grain within the narrowest limits. Accordingly, for many years not only was no export of grain allowed to European countries, but it was a crime to carry the product of one country to another for sale. As a consequence, partly of this restriction, and partly because the only means of transportation was by animal power, grain was so high in one part of England that people starved, while in another county it was so low as to be almost valueless. When the restriction on domestic commerce was removed, the landlords were favored by the prohibition of importation. As the population of the towns increased, grain became extortionately high, until it was a question of lower price or death. The corn laws went down. In the United States, as well have means of transportation kept pace with extension of agriculture, that the surplus of one section could be at once transported to the region of scarcity. The lines of the Burlington system, for instance, afford almost all sections of ten great Western states connection with the world's markets. These states embrace the great wheat and corn raising part of the United States, and if you wish to traverse any of them, your ticket should read via Burlington Route. Any coupon ticket agent can attend to your wants in this respect. or you can address W. J. C. Kenyon, Gen. Pass. Agent, St Paul, Minn.

Wants $25,000 Damages.

A telegram from Mankato says: Mrs. Jennie Andrews, wife of George Andrews, of the well known opera company, is about to bring an action against the Northern Pacific Railway company in the United States court for $25,000 for personal injuries received in the wreck of the opera train at Brainerd two years ago, when Mrs. Ed. Andrews met death in a burning car. Plaintiff received permanent injuries, and has retained Pfau & Young and W. N. Flymat as attorneys. Another action will be brought by George Andrews against the Chicago & Northwestern railway for injuries received a few weeks ago at, Elroy, while bringing the remains of his brother Charles Andrews, to this city, who was killed at Morrison, Ill. The company's private car was demolished and plaintiff had several ribs broken, for which he asks $5 000.
