GOVERNOR NELSON'S SPEECH. COMMISSIONERS' PROCEEDINGS.

Gov. Kante Nelson opened the campaign in this city on Wednesday evening by an address at the opera house.

The Minneapolis Journal in speaking of the government dam which is to be put in at Gull Lake says that it is now generally considered that the government storage reservoir system at the headwaters of the Mississippi river is one of the best things the business interest of the upper Mississippi which has ever been proposed for the same money.

The Gull Lake Dam. The Minneapolis Journal in speaking of the government dam which is to be put in at Gull Lake says that it is now generally considered that the government storage reservoir system at the headwaters of the Mississippi river is one of the best things the business interest of the upper Mississippi which has ever been proposed for the same money.

As many people are aware, the reservoir system consists of five artificial basins, formed by the damming of the Mississippi and its tributaries.

The Gull river project would have not been put through until earlier had it not been for the pine land interests, which would have been injured.

The Crow Wing river enters the Mississippi just below Brainerd and the Gull river, the outlet of Gull Lake joins the Crow Wing a short distance above its mouth.

The reservoir project under Assistant Engineer Powell, of the engineering department, which is in the field will have some definite report on these plans in a short time.

During the past summer and so far this summer the reservoir system has proved its efficiency beyond all possible doubt.
