R.P.C. GAS COFFEE ROASTER. The above is a set of the celebrated GAS ROASTER, which has revolutionized the roasted coffee business. Instead of its being slowly baked over a fire and all the essential oils lost, the coffee in the roaster is taken up, dropping all the oil which makes the difference between a good and bad cup of coffee.

The best of medicines are none too good for sick folk. It had gone to seek with second grade goods. It is a great satisfaction to us to know that every prescription sent out is as good as good coffee can make them. No matter what you pay for it you can get better.
