CLEVELAND AS A WIFE.

Gov. Cleveland is a married man for real estate boomers. He has made money in large sums for landholders. These widely separated parts of the country, when he was married, his plan of dividing his first term, Mr. Cleveland bought for \$11,000 a piece of 30 acres of the suburbs of Washington.

That previously divisions of some and rousing had changed hands. Cleveland bought had been laid out, an electric road had been built, and all of the necessities of real estate speculation on a grand scale had been arranged.

Mr. Cleveland's next venture was in a Florida tract of land on Brevard Bay. He went there on the recommendation of Joseph Jefferson, found good fishing and bought heavily of the rocky and sandy shore.

The history of Red Top repeated itself, and Mr. Cleveland did not sell well when the boom came. He then had come into prominence as one of the choicest localities on the Atlantic coast for summer homes.

He has gone up and will the land values parallel those of the first night. Mr. Cleveland has not lost his business. And now the news that Cleveland is to be elected president of the United States has been received.

He passed the decade at both ends of his life. He was a man of great energy, and he kept up under such a strain. In addition to his studies, he kept teaching school children in the evenings. will pay to give a range so large that the fowls will not be able to eat all the grain that grows on it. There is no economy in restricting the range and feeding grain. Grain is one of the cheapest foods that can be had.

Just how large the range should be will depend on many things. One of these things is the nature of the soil and the abundance of the growth of grass on it.

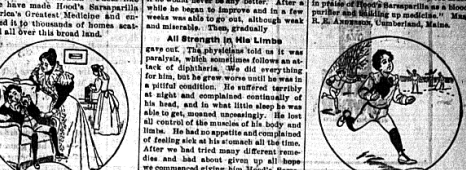

Suppose you give an acre of land to fifty fowls. Will it not pay? We think it will. In the first place the poultry will be kept busy eating the grain that grows on it.
