Attempted Arson—Some One Trying to Burn the Town.

On Monday and Tuesday nights last some devil or devils incarnate, made almost unceasing attempts to burn the town.

On Monday night kerosene oil and tinder were applied to the rear of Hills' store, and had just got a fair start as it was accidentally discovered by Milt Askew, Esq., who gave the alarm and the fire was extinguished just in time to save a fearful conflagration in that portion of town.

It was discovered after the fire was put out, that some empty kerosene barrels had been piled up into a corner behind the warehouse and another small addition, and kerosene oil had been freely applied to the walls of the building.

On Tuesday night, toward morning, the man who had been placed on watch at Hills' discovered fire in the next block back. He gave the alarm and ran to the scene of the fire, when it was discovered to be in rear of Morrison & Fairbanks' store, and originating in almost exactly the same manner as the night previous.

Dry matter had been piled up against the rear of the building and kerosene oil plentifully applied thereto as well as to the end of the house.

Assistance promptly came to Mr. Hoffman, who discovered it, and by a little good work the fire was subdued.

We understand that the authorities have some suspicions as to who the parties are, who would engage in this despicable work, and judging from the way we have heard an indignant people talk, those suspicions had better not approach anything like a certainty.

For the sake of the neck or necks of those engaged in this fearful incendiary business. It is presumed that plunder is the object, and a black-hearted villain he must be who would burn a town and probably a hundred people for what he could carry off in his arms of plunder.

Minor Locals. The Rev. Mr. Hinton preached in the school house last Sunday, and in the evening gave an address relating to the operations and wonderful work being accomplished by the American Bible Society.

His morning sermon was excellent, listened to by a large congregation, and his evening's address was especially interesting and edifying.

Our dealers have nearly or quite all signed a petition to close their respective places of business on the Sabbath day after twelve o'clock M. This is a most commendable move, and smacks of Christian civilization in a most eminent degree, which could only be excelled by an agreement to include the whole day in the stipulations; but half a holiday is better than no holiday, and to have a Sunday six hours long, even, is better than no Sunday at all—the other half will come in due time.

LAVORN & GUTLER received a lot of goods for their store at Little Falls, from Milwaukee, by the way of Duluth and Brainerd, and they claim to have saved twenty per cent. over having it come the other way. This will mark a new era in shipments. St. Paul may be able to save money on freights by having them come to them by way of Duluth—and Brainerd season as our branch is completed.

Dirty Alleys and Things. A row of the alleys and back places in this town are decidedly out of sorts; if a person gets in a hurry and cuts across the alleys he is treated to a nosegay of a thousand stinks, none of which are desirable, though green flies do flourish much in these places.

On the side of the bluff, just south of where Third intersects Laurel, is another charnel house of offalings, which makes that locality a stench to the nostrils. It is a pleasant "lookout" there, but for this fact, and persons in the habit of throwing refuse matter there should stop it or else be stopped.

New Law Firm. Messrs. Holland & Steele have associated themselves together in the practice of law in Brainerd, and will be seen by their card elsewhere. Mr. G. W. Holland is well known here as a man of enterprise and ability as a lawyer, and although Mr. Steele is a stranger to us, comparatively, we have known him well as a lawyer of respectability. We wish the new firm success, in all their cash clients in particular.

Improvements.

The work of building, and improving in all ways goes heavily on in Brainerd. The great things being done are so numerous that we can speak of but the more prominent.

E. H. Rowan and manufacturer house and public hall, is among the greatest and most important in the list. This building is fifty feet front and seventy deep—two beautiful storerooms below, a grand public hall in the second story, besides private offices, and a few rooms, the full length in the side story, light, supplied for a lodge room.

This building has been put up by the most substantial manner, from cellar to attic, and Mr. Rowan's ideas of a passing notice for his great enterprise and liberal spirit, as so prominently and creditably displayed in this fine structure.

The location of the building is one of the very best, too, in the city—on the corner of Front and Sixth, fronting the Headquarters Hotel.

This Railroad Headquarters building and hotel and its surroundings are being beautified in various ways. A lot of new picket fence has been built, the grounds raked up and cleared away and the offices newly fitted and painted.

The hotel office has been furnished with a handsome counter—the design and workmanship of Mr. Doney—which is such a production as would ornament any first class hotel. It was painted by Mr. Post, one of the champions of the brush in this western country.

Mr. Post, with his own of artists has also been giving the outside of this mammoth building its final coat this week; and to say anything but the most laudatory in appearance, does not express it; the "Headquarters" really presents an imposing appearance as it now is, compared to what it then was.

Our friends W. W. and B. F. Hartley have also been putting on an extensive addition to the rear of their new store house, (now occupied by Messrs. Brown & Parkinson, grocers, etc.) a new hotel is also rapidly approaching completion, and is a very fine building.

There are probably twenty or thirty other new buildings in course of construction in various portions of town, including very many fine residences; but we have been so closely engaged in the office for the past week, that we are not "posted" as to details.

IMPROVEMENTS and building is so emphatically the order in Brainerd, that should one be absent a week he would scarcely recognize the place on his return.

This manner in which this place is going ahead is entirely without precedent so far as we ever noticed in any town throughout the western country, in a residence of eighteen years.

Personal. We had the pleasure of forming the acquaintance this week of J. M. Hanford, Esq. who has just arrived from New England.

We are pleased to know that he intends remaining in Brainerd, and will fill the position of Secretary to Mr. Chase, the General Freight Agent of the Northern Pacific here.

A distinguished visitor from England, accompanied by his wife, made Brainerd, and the various points on the line as far out as Moorhead, a visit this week, in the person of Sargeant Sleigh. Mr. Sleigh is a legal gentleman a native in the "old country." He arrived here by special train on Saturday night; spent most of Sunday in looking over our beautiful town—with which he and his wife were delighted—and later in the day, accompanied by General Head, Esq., Mr. E. H. Rowan, Mr. Chase, and many others of the Railroad officials here, went by special train, returning Sunday night, or Monday morning.

It next came in upon us, one of our own professors—R. C. Mitchell, Esq., of the Duluth, Philly White. This was on Tuesday evening. Mr. Mitchell spent Wednesday in our town, looking after business and subscriptions for his very excellent paper; and we are happy to know that he did well. The Tribune possesses a special value to the people along the line of the Northern Pacific; as besides being a "not political" paper for the approaching campaign, it contains all the news by telegraph which by five or six many hours in advance of the St. Paul Dailies. We bespeak for the Tribune a good support in this community.

Mr. Brown, cousin of W. W. Hartley, was in town a day or two this week. He was on his way to the Port Garry country—or the Canadian Pacific Railroad.

We received a call from Mr. Wood on Wednesday, of the firm of Wood & Sweet, St. Paul, Attorneys for the Northern Pacific Railroad. We are glad to have made Mr. Wood's acquaintance; he figures like the right man, and as a lawyer ranks high in the state, though very, comparatively speaking, a young man.

A. J. Nissen, Esq., Attorney from Duluth, favored us with a call, as also Mr. Harry, another gentleman.

A. J. Nissen, Esq., Attorney from Duluth, favored us with a call, as also Mr. Harry, another gentleman.

Curious Freak of a Locomotive.

On Monday morning last the train for the east left here at the usual time, and met, ere it had gone a mile, with a most singular accident. At the machine shop, round house and car shops, which are located half a mile above town, there is a switch track running from the round house to the main track—a distance of probably sixty rods. On this switch, near the turn table stood one of the fine and powerful locomotives for which the N. P. is noted, which had been standing there for half an hour or more. There was no one on or near her at the time of the accident, the moving train up the main track. As the train passed the junction with the switch track, the engine started to go in the direction of the "switch." The "brakes" if applied the faster; and as the train could not be stopped before passing the end of the switch it was a race in the hope of getting past ere the locomotive came crashing upon it. It was no race, however, and just as the train got half way up, the front engine came into the track; striking it about midway and about two cars ahead of the passenger coach. Three freight cars were knocked hither-skipper of the track and were badly wrecked, while the engine, which also ran off the track, at the end of the switch, was also considerably damaged. Had the train been an instant sooner the locomotive would have crashed into the passenger coach, however, he was discovered off to one side, in rear of a wigwam gambling with a small party. Mr. Whitehead stealthily passed into the wigwam at the front, and unseen by the gambling party. As soon as he was well inside, and by previous intimation, the half-breed went around carelessly to the party in rear of the tent, and told the Pillager that a friend was inside and wished to see him. Thereupon, he left the game and went in, and knowing Mr. Whitehead, recognized his hand! It was accompanied with such a grip as only a powerful man could give, and held firmly. Mr. Whitehead told him what his business was, and finally that he must go with him immediately. The Indian demurred, at first by saying he could not go that day; etc. He was told he must go then; when he commenced to grow impatient, and declared he would not go. At this point in the game, however, the assistants came in, and he was secured, and taken at once to Whitehead's post, where they held, and where the whole band had, within a few minutes after the arrest, collected, to see what was the matter. The Pillager had a Sunday Lake square for a wife, and although he had no available reputation for sterling virtue, yet through marriage ties he had a good many friends, and besides, there appeared to be a hostility at first on the part of the whole band, to such a proceeding. For a time Whitehead's party scarcely knew how the scene would turn with them, but after seeing that the prisoner was all safe inside, he went out at an opportune moment and, in the presence of the Chief, and his band gave them a speech in reference to the "situation." He told them that he possessed unequivocal proof that the Pillager then in custody was one of the parties to the unprovoked and shocking murder of the Cook family, and that it was far better for them that he should come quietly and get them, than to have a thousand soldiers sent among them; for the Government was bound to have the murderers at any cost, and therefore it would be madness on their part to resist the arrest of any of the murderers wherever found. He assured them that the prisoner would have justice done him, and that if he was, after a trial, found innocent he would be set at liberty, and if guilty he would have to suffer the penalty of the law.

After this address, the Indians appeared better satisfied, and the chief came forward and responded somewhat at length. He said he thought that it was best, probably, to have justice dealt out to him according to the white man's rule; all he wanted was that justice be done the prisoner, and begged of Mr. Whitehead that he would say to the Governor, that no resistance on their part was offered; and that it was the wish of the Ojibwas, if he was guilty of the murder, to have him punished accordingly.

On their way down the river on Tuesday in a canoe, the party stopped to cook and eat dinner on the bank, and in an unguarded moment the Indian threw off his blanket and sprang into the river, and very nearly succeeded in making good his escape. The captors, however, made chase in the canoe, and after a hard hour's pursuit he was recaptured, and then secured here on Wednesday morning, and for the night was confined in the jail.

In the morning, Major Brock, who was at Oak Lake, still engaged in working up the case, was telegraphed for, and arrived here by extra train during Wednesday night. Thursday morning he took the Pillager in a canoe to Oak Lake for a preliminary examination. The Major also hoped by making the Indian believe he was only wanted as a witness, to get evidence from him as to who the other murderers were, and where they were. Many threats were made by individual members of this community against the

Arrest of One of the Cook Family Murderers. On Wednesday evening last, Mr. James Whitehead, arrived here by the train from the east having in charge an Indian, who is believed, without a doubt, to be one of the murderers of the Cook family near Oak Lake. A few days ago, Mr. Whitehead—who has been a trader among the Indians in this upper country a number of years—was sojourning here with his nephews, the Hart-Bros., he received a telegram from a half-breed, dated at Sandy Lake Station, stating that a Pillager Indian was at that time visiting the Sandy Lake band, and who in his opinion was one of the murderers. He, the half-breed, felt satisfied from the fact that he had seen in the possession of this Pillager a gold chain, beads, jewelry, and a lady's cloak; and that he was among the Chippewas, even, as a very bad Indian. Upon receiving this information Mr. Whitehead, accompanied by Attorneys Holland and Frost, of this place, went on Tuesday morning's train as far as Sandy Lake Station, east of here on the road, and thence through the woods to the camp of the Sandy Lake band, which is on the lake of that name, and a short distance from Whitehead's trading post. Arriving at the camp, Mr. Whitehead's party, guided by the half-breed, found a big Medicine Dance in full progress, but in the great mass failed to find the Pillager. After an extensive search, however, he was discovered off to one side, in rear of a wigwam gambling with a small party. Mr. Whitehead stealthily passed into the wigwam at the front, and unseen by the gambling party. As soon as he was well inside, and by previous intimation, the half-breed went around carelessly to the party in rear of the tent, and told the Pillager that a friend was inside and wished to see him. Thereupon, he left the game and went in, and knowing Mr. Whitehead, recognized his hand! It was accompanied with such a grip as only a powerful man could give, and held firmly. Mr. Whitehead told him what his business was, and finally that he must go with him immediately. The Indian demurred, at first by saying he could not go that day; etc. He was told he must go then; when he commenced to grow impatient, and declared he would not go. At this point in the game, however, the assistants came in, and he was secured, and taken at once to Whitehead's post, where they held, and where the whole band had, within a few minutes after the arrest, collected, to see what was the matter. The Pillager had a Sunday Lake square for a wife, and although he had no available reputation for sterling virtue, yet through marriage ties he had a good many friends, and besides, there appeared to be a hostility at first on the part of the whole band, to such a proceeding. For a time Whitehead's party scarcely knew how the scene would turn with them, but after seeing that the prisoner was all safe inside, he went out at an opportune moment and, in the presence of the Chief, and his band gave them a speech in reference to the "situation." He told them that he possessed unequivocal proof that the Pillager then in custody was one of the parties to the unprovoked and shocking murder of the Cook family, and that it was far better for them that he should come quietly and get them, than to have a thousand soldiers sent among them; for the Government was bound to have the murderers at any cost, and therefore it would be madness on their part to resist the arrest of any of the murderers wherever found. He assured them that the prisoner would have justice done him, and that if he was, after a trial, found innocent he would be set at liberty, and if guilty he would have to suffer the penalty of the law.

After this address, the Indians appeared better satisfied, and the chief came forward and responded somewhat at length. He said he thought that it was best, probably, to have justice dealt out to him according to the white man's rule; all he wanted was that justice be done the prisoner, and begged of Mr. Whitehead that he would say to the Governor, that no resistance on their part was offered; and that it was the wish of the Ojibwas, if he was guilty of the murder, to have him punished accordingly.

FIFTY FOR A LONELY YOUNG MAN.

O. W. Holmes in the May Atlantic writes as follows: "I know nothing in the world tenderer than the pity that a kindhearted young girl has for a young man who feels lonely. It is true that these dear creatures are all com-

CIVILIZATION DISGRACED BY THE HOUSE OF COMMONS.—The writer of "Sketches in Parliament," in the Illustrated London News, himself a member of the House, and rather inclined to uphold the immaturity of that Assembly, in speaking of the treatment received by Sir Charles Dilke on the occasion of his memorable speech in favor of Republicanism, confesses that "such misdeeds, such gratuitous, such yelling, howling, groaning, whistling, howling, howling, as are inconceivable to the imagination, came from the pious gentlemen of England for a mortal hour, in the presence of spectators."

A letter from the Hessler expedition describes its progress through the Straits of Magellan. The good fortune of Prof. Agassiz and his associates in respect to scientific discoveries still attends them. We read of fish shaped like wicker-baskets, and a sea hag that keeps up an appetite so voracious that after being laid out to dry on deck she is still able to kill and eat other marine animals.

An agricultural correspondent displays in the following, a wild and ferocious cruelty to animals which we hope will not be imitated. Besides it can be no easy matter to whitewash mice: "I have kept rabbits and mice, for years from my fruit trees, by whitewashing them in fall or winter."

"Grelley bird" is offered to the public by a Kansas City grocer, who takes that delicate way of intimating that is not very strong.

HESSAY WINTER DAVIS ORATORY.

It will be remembered that a Maryland Representative, Harris, uttered words in enology of Jeff Davis and the Confederacy, which showed a condition of mental treason at least. A motion of expulsion was offered, wild excitement followed. Mr. Colfax left the chair in order to sustain it, and did so in a speech of marked and impetuous power. By the way, Mr. Colfax is known to reportorial memories as the most rapid speaker of his time.

The final performance of Nilsson in New York previous to her departure for Europe is made the subject of a dreadful amount of gush in the metropolitan journals. Even the placid Tribune says: "Accompanied as it the thought of all the worship and devotion she had excited during the year was with her, and she was moved by a grateful impulse to reward her adorers once for all, without reserve. When the curtain fell for the last time a quite unusual demonstration took place. The shower of bouquets was more than she could carry away. Four times she was called back to receive the clamorous farewells of the audience.

During the absence of the Emperor of Brazil, his charming daughter Donna Isabel, aged six Regent. She is said to have maintained her brilliant with ability, and has been gallantly sustained by the politicians, young and old, of all parties. The Brazilians proposed to erect a statue of her in honor of her Regency, but with the same modesty which characterized her father on a similar occasion, she firmly opposed the project.

—Josh Billings says: "There is no better evidence of true friendship than to speak of a man's virtues as his own and of his virtues behind his back."

A LONE WIDOW UNDERGROUND.

The other day, on the Middletown railway, I sat next to a shifty, long-nosed man with red whiskers. Opposite to us sat a middle-aged lady in black. The little man stared at her very hard, adged a good deal, and opened a conversation.

"In mourning, ma'am, I see." "No." "One of the young ones? Baby, oh?" "I have no babies."

The lady made no reply to this, but got out at the next station. The little long-nosed man looked around as though in search of another victim. At last he fixed on me. "Got a hat-band on, I see?" "Yes. I put it on because my hat was shabby."

As the California earthquake approached, a young lady improved the opportunity to faint away in her lover's arms, it being the first time either had dared to establish such a propinquity. She did not recover for twenty minutes or more, and the gentleman took a vast oath on the morrow that he would "give twenty-five dollars a shook for earthquakes."

A Lafayette lover seated himself on a barrel turned on its side, while serenading his heart's mistress. In his ecstasy he rolled the barrel over, slammed his guitar against a shutter in his efforts to regain his balance, and disappeared in the curtain. The bubbling cry of the strong swimmer in his agony brought out the entire family, including the bull-dog, in various brief and picturesque costumes, ranging all the way from a robe de nuit and curl papers, worn by a innocent cause of it, to a simple yet serviceable collar, ornamented with spikes, worn by the bull dog. He was fished out of the curtain, and then the bull-dog went for him, and a more demoralized lover never took refuge in the first woodshed he encountered.

TRANSPARENT PUDING.—Warm half a pound of fresh butter, but do not melt it. Mix with it half a pound of powdered loaf sugar, and stir them together till they are perfectly light. Add a small nutmeg, grated, or half a large one. Beat eight eggs as light as possible, and stir them gradually into the butter and sugar. Finish it with sufficient extract of rose to give a fine flavor. Strain the whole very hard, put a deep dish, put in the mixture, and bake it half an hour. Serve it up cold. You may bake this pudding in puff-paste.

BOHEMIAN CHAM.—Take four ounces of any fruit you choose, which has been stoned, soft and sweetened. Pass the fruit through a sieve and add one and a half ounces of melted or dissolved lard, and a half pint of fruit; mix it well together, then whip a pint of rich cream, and add the fruit and lard gradually to it. Then pour it all into a mould, and set it on ice or in a cool place, and when hardened or set, dip the mould a moment in warm water, and turn it out ready for the table.

APPLE FLOAT.—Take six large apples, pare, slice and stew them in as much water as will cover them. When well done, press them through a sieve, and make very sweet with crushed or loaf sugar. While cooling, beat the whites of four eggs to a stiff froth, and stir in the apples; flavor with lemon or vanilla. Serve with sweet cream.

The American Agriculturist thinks an acre of ground planted to corn in rows three feet apart and very thick in the hill—six or four bushels of seed to the acre, may be relied on to furnish the chief food of ten cows during the two driest months of summer.

A CHECK WAY TO RAISE POTATOES.

From the American Farm Journal. Though deep and pulverized well, Furrow light three feet apart one way. One middle sized potato with one or two eyes in each piece. Drop two pieces ten inches apart in line in the furrow; leave eighteen inches between hills and so on until all are dropped. This takes one horse and plough a deep furrow over the potatoes, then bank forming a ridge. Leave them until the sprouts are two inches long, then level the ridge. For the leveler take a plank three feet long and ten inches broad; sharpen the lower edge; bore two inch holes for fill and handles.

Set the fills with a level so the right end will draw about fifteen inches back of the left. Let your horse walk on the right side as the level will help to keep the leveler on the row. Hold on down with the handles and scrape as near the sprouts as you can and not disturb them. Then let them stand till the tops are eight inches high. Plough light, throwing the furrow as near as you can and not crowd the tops over as you would cover them by backing up the other side. Pull the loose mould with a hoe up to the tops carefully so as to cover all the weeds that may start among the tops. If your ground is inclined to be weedy you may have to go through a second time. This you may do by ploughing deeper the second time. Now you may say why all this parade about raising a crop. You can get along with a small patch almost any way, but when you try to raise five or ten acres you will find the difference, as I prefer working with a horse to pulling weeds by hand. I worked a half acre weed patch last year; hoed them twice; spent three-fourths of a day each time and could carry all the weeds I pulled through the season in a peck basket. I kept the ground clear of weeds. If the ground becomes weedy before the tops are large enough to plough go through with a cultivator. It will do no harm.

THE GARDEN.

Farmers—speaking in a general sense—should enclose their gardens. If they would reflect a moment, they would find that there is no part of their premises half so profitable as the garden, or as contributing half so much to the comfort and health of the family. Instead, as many do, of having but a ditch or two of peas, green beans, beets, sugar corn, radishes, lettuce, &c., as the product of a single planting, they should put in a succession of crops, so that through the whole season they could enjoy these desirable necessities of life. Try it—enclose your garden—devote a day or two extra to your garden now and then; do not depend entirely upon the females of the family who usually have hard duties to perform during the growing season; and having once tried it, no good husband or father will ever again show any shortcomings in this respect. Wives and daughters could often find that a little coaxing would do a great deal in behalf of carrying out their wishes in this respect.—American Farm Journal.

TRANSPLANTING EVERGREENS.

Why writes on horticultural topics, should, with almost one accord, advise planting evergreens later in the season than deciduous trees, is something that I cannot understand. The frost is barely out of the ground, but I have begun to transplant evergreens; this has been my practice for the last twenty years, and I do not believe any advocate of late planting was ever more successful. Trees put into the earth in time to receive the benefits of heavy spring rains in settling the soil about their roots, are more likely to live than if the operation is delayed until later in the season; all the fine theories to the contrary notwithstanding.—Cor. Rural New Yorker.

"What will you drink?" asked a waiter of a young lad who for the first time accompanied his father to a public dinner. Uncertain what to say, and feeling sure that he could not be wrong if he followed his father's example, replied: "I'll take what father takes." The answer reached the father's ears and instantly the full responsibility of his position flashed upon him to the astonishment of those who knew him, he said: "Water'll I take water." And from that day to this strong drink has been banished from the man's house.

wretch, but law and order still predominated. The sight of the massacred lady's cloak and jewelry, and other treasured family keepsakes, however, aroused a feeling in the beholder that can only be faintly described. The prisoner was one of those hardened rascals looking around, with a look which the whole human family too plentifully shared.

Amesland.—Last evening on the train from the west, Major Brackett and Mr. Whitehead, returned again, on their way to St. Paul, having in charge two Indians, one being the Indian referred to above, the other, one of those implicated in the murder of the Swede family last summer. They were chained together and were kept in the jail last night and left for St. Paul this morning. They both had an examination at Oak Lake, and as was hoped, the "Cook family murderer" related to store, made a full and unequivocal confession of the whole affair to Mr. Whitehead. He said there was a party of four of them who were to go to Mr. Cook's house for some furs. That he went up to White Earth on some errand before they were to go, but ere he got back the other three Pillager Indians had gone ahead, and it was not until immediately after the murder that he joined the other three. That when he did they gave him a hundred rat skins and the goods found in his possession as "hush money." They told him all that had happened. They had gone to Mr. Cook's and asked for the furs, but Mr. Cook "was very cross with them as he always was," and one of the three struck him with his tomahawk; he struck him harder than he intended, however, and finding that he had killed him, the three after consultation determined that to hide the deed they must also kill Mrs. Cook and burn the house and them in it. They next murdered her, and then commenced searching the premises for furs. They finally thought of going up stairs, where they found the three little children in bed asleep, but whom they had not thought of before. They next proceeded to butcher them, in their beds, which done, they piled the bodies all in a heap, and after setting the house well in flames made their escape, carrying away all valuables and furs they could find. The Indian now in custody, "Bobolink," joined them a short distance from the house, got his share of the spoils, and took a wide circuit around the settlement toward the west, while the other three went to the north, toward Leech Lake, where he says they now are. He also gave their names to Mr. Whitehead. Among the articles he received from the three whom he says committed this most awful deed, was Mrs. Cook's cloak, watch chain, and locket chain, which were found with him when arrested, and he also got the locket, but sold it to a man at the Junction. It was not until Mr. Whitehead took him alone into a room at Oak Lake, and told him just how matters stood with him, and after he had given him a good deal of urgent advice as to what was best for him to do, that he would confess anything. Finally he burst into tears and told Mr. W. that he would tell him all about it, and conceal nothing, which he proceeded to do. After he had confessed the whole transaction, he begged Mr. Whitehead that if he had to be hung for what he had done to have him spared for a time, as he soon expected to become a father, and his young wife a mother, and he wished to live to see his child—then he would go to the spirit land contented.

Major Brackett and Mr. Whitehead will start for Leech Lake next week accompanied by a detachment of twenty-five soldiers, and will bring home the three murderers whose names and exact location they now know, and thus will the mystery that up to yesterday has so effectually shrouded this horrid tragedy be brought to light and ended. But let the movements of this Chippewa nation during the immediate future be closely watched.

**Sunday Notice.**  
BRAINERD, May 18, 1872.

The undersigned business men of Brainerd have agreed to close up their establishments at noon (half) on Sundays after this date provided the custom be adopted by all business firms in the city, (saloons excepted only). And they furthermore agree not to have or sell after the above named hour, on each and every Sabbath day in future, unless this notice is given to the respective establishments who have heretofore allowed their names.

Orders for all kinds of Tin and Sheet-iron Work promptly executed.

**SEVEN-THIRTY GOLD LOAN.**

In its First Mortgage Gold Bonds the Northern Pacific Railroad Company furnishes to the public an Investment Security, which combines the ready Negotiability, the Convenience, and the high Credit of a first-class Railroad Bond, with the Solidity and Safety of a Real Estate Mortgage on Land worth at least twice the amount loaned.

These Bonds, which AFTER FULL INVESTIGATION, WE SERIOUSLY RECOMMEND AS A RELIABLE AND GENERALLY PROFITABLE INVESTMENT, AND WHICH NOW STAND ABOVE THE MOST SOLID AND FAVORITE SECURITIES, have the following leading features:

1. The issue is limited to \$50,000 per mile of road; holders are exempt from United States tax; the Principal and Interest are payable in Gold—the Principal in thirty years, and the interest (at the Bank-Exchange of Jay Cooke & Co., New York) semi-annually, first of January and July, at the rate of 7 1/2 per cent. per annum—less 2 per cent. for commission.

2. The Bonds are a First and Only Mortgage on the Road, its Equipment and Buildings, and also on a Land Grant, which, on the completion of the Road, will exceed 25,000 Acres of the Company's Land, at market price—a provision which practically gives the holder of these mortgage bonds the power of foreclosure at will.

3. The proceeds of all sales of Land are required to be applied by the Trustees of the bondholders as a sinking fund to the purchase and cancellation of the first mortgage bonds, or, temporarily, to the payment of interest on the Company's Bonds.

4. The Company's Bonds are a constant and heavy purchaser of its own securities in the open market from the time the Bonds are completed until their maturity, or are all bought in. The effect of this will naturally be a steady rise in the value of the bonds.

EXCHANGING 100-5-20.—In view of the ability and credit of the Company, the security of the Bonds, and the fact that the interest is paid in gold, it is a safe investment. Those who are exchanging them for Northern Pacific Bonds, thus adding to their principal the present premium on Government Bonds, and increasing their yearly interest, become nearly one-third.

All marketable stocks and bonds will be received by express or otherwise, at current prices in exchange for Northern Pacific seven-fifties, without expense to the investor. Duplicate and full information will be furnished on application.
