Rev. Mr. GILLMAN will preach on the subject of Emigration, on Sunday evening next, and on the following Sabbath, his subject will be: "A truly religious man, as illustrated in the life of George Washington."

Proceedings of the City Republican Convention of the City of Brainerd, County of Crow Wing, and State of Minnesota, held in said City on March 27th, 1873, pursuant to call in Brainerd, Tribune.

Meeting was next called to order, and upon motion of W. B. Lynde, J. S. Campbell, and J. B. Conant, the Committee on Credentials, and the Committee on Resolutions, were appointed. The Committee on Credentials reported the following named persons as delegates to the Convention: W. B. Lynde, J. S. Campbell, J. B. Conant, W. W. Hartley, M. Murphy, J. E. Wilson, H. T. Hyren, J. R. Murphy, E. L. Fowler, H. T. Hyren.

There's children were burned to death the other day near Reed's Landing, by a prairie fire.

The weather is again delightful, after a cold snap the first of the week. Numerous prairie fires are moving and spreading for good earnest season's work, in completing and extending.

The early completion of the Brainerd Branch Railroad to Sank Rapids is a fact fact. For Brainerd's sake, let us see this season to spend the heated term among our cool groves and crystal lakes. We have fine hotels for their accommodation.

The City Election, and what is involved in it.

Two candidates for the office of Mayor are presented to the voters of Brainerd, for their suffrage. Both have served in official capacities, since the organization of the city. Mr. Heathcote as a member of the Council, and Mr. Bly as Mayor. Both have made records which it is worth your while to examine.

As Secretary of the Pen we have been favored with a sample of the celebrated Spencerian Steel Pens, and after trying them quite thoroughly are convinced of their superior merit.

The pens are comprised in fifteen numbers, each differing in the flexibility and fineness of point, so that the most fastidious penman cannot fail to find among the fifteen just such a pen as will suit his fancy. The pens are famous for their elasticity of movement, smoothness of point and great durability, and are a nearer approximation to the real Swan Quill Pen than any pen ever made. They are manufactured in England under the supervision of the original inventor of Steel Pens, the venerable Joshua Mason, and Joseph Gillott—the latter being a few of the numbers after the model of the No. 2. The pens are famous penmen. They are used very largely in the common schools of the United States, in all the principal cities of the world, and in Government offices at Washington, in the banks and commercial offices throughout the country, the sale reaching an enormous quantity annually.

Having understood that the "Convention" was held on Thursday, and that Mr. Heathcote, Mr. Bly and others, are claiming that J. as Chairman of the City Central Committee, recognized the body as the legitimate Republican Convention, convened under regular call, I take this method of withdrawing my name from the Convention, and that they withdrew from the Convention under call of the Central Committee, and that they withdrew from the Convention under call of the Central Committee, and that they withdrew from the Convention under call of the Central Committee.

THE Muddle.

The primary meetings of the two factions in Brainerd, for the nomination of candidates for the various City offices were characterized throughout by a disorderly and apparently lawless spirit that was pitiable to behold. We were led to wonder, while looking on at some of the meetings, whether Republican government was not an ignominious farce. Certainly, had we not witnessed so many political gatherings where order and majority ruled, and had our opinions been formed by witnessing these meetings, we should have been forced to stamp self-government a humbug.

After various Ward caucuses—some regular, some spurious—had been engaged, and the time for the City Convention to meet had arrived, the Court House was the scene of a gathering of disorder, which was disputable, to say the least. The Republican Convention called to meet there should have been composed of five Republican delegates from each Ward—fifteen in all—but instead, there were five delegations, twenty-five delegates, and an incomprehensible mass of noisy, shouting lookers on. The disorder at the various Ward meetings seemed to have all been congregated there, and a general muddle ensued, hot words passed, and the majority of those claiming to be the regular Republican delegates withdrew, while the others went on and made their nominations, etc. Those who withdrew, also retired to another building and made their nominations. The proceedings of both parties, or rather factions (for that seems the proper name), at their respective conventions appear in today's paper, as a matter of news, so far as their proceedings are concerned.

We have to express, however, that in our opinion the candidates nominated by the Bly faction—with all due respect for the feelings of many patriotic friends on that side of the house—as not regular, and the candidates nominated by them as not the Republican nominees for the several positions they were contending for, on this proposition, course, we have our estimate on the matter, and in the primary, but we cut so quickly as to shut out the Bly faction, and we cordially invite all good citizens to aid in their election, and good government to come forward and labor earnestly, fairly and squarely for their success.
