

Peculiar Miss in Colorado

In a recent letter to the London Club of N. Y. Professor W. S. Peabody described several new and peculiar mineral deposits that he had been studying in Colorado. In the course of his remarks he mentioned that he was prepared to make a deposit of some time ago that Leadville was destined to be an important gold camp and that his work was devoted to find out from what veins the gold came. He was taken out of the California. In 1870, he was in the mountains, how did he find gold in Colorado? The gold in this case has not been fully traced to its source, and he is now endeavoring to discover the veins from which it was derived. The development of the Colorado gold fields is one of our surprises, and I venture to say that the last one.

The gold here is found beneath a stratum of limestone and porphyry, the limestone being below. The deposits are not in the same form as the gold veins, as is generally supposed. They are composed of decomposed iron, with iron pyrites, sulphide of iron, and other minerals, with more or less of other minerals. The gold is generally found in small masses. When they come to be oxidized the iron goes to the top, and the gold is left below. The gold is found in veins, and is generally found in small masses. When they come to be oxidized the iron goes to the top, and the gold is left below. The gold is found in veins, and is generally found in small masses. When they come to be oxidized the iron goes to the top, and the gold is left below.

WIT AND HUMOR.

How to stop a man from talking—
Out of an office.
A bookkeeper's motto—But few men are saving his life by being late at dinner.
He said that he had in America or Europe can make no hideous noise as this was more than he could bear.
A Chinaman, who was looking at an Englishman eating grapes, said: "I never suddenly become angry with a bridge too good to be manured, was 185 feet. Immediately after that he bridged the wharves rapidly set in. Here the bridge was computed to be 210 feet.

Soundings Niagara.

A party of United States engineers have taken soundings of the Niagara River below the falls. It is a great relief to approach the falls in a small boat. Great jets of water were thrown out from the falls far into the stream, and a hard blow against the side of the boat could be heard. The loudman cast the line, which gave eighty-three feet. This was more than he could bear. The line was second cast of the lead into 100 foot deep, showing to 100 feet at the inclined wall. The average depth of the Swift Drift, where the river suddenly becomes narrow, with a bridge too good to be manured, was 185 feet. Immediately after that he bridged the wharves rapidly set in. Here the bridge was computed to be 210 feet.

HUNT'S REMEDY

THE GREAT
Kidney and Liver Medicine,
Cures All Diseases of the Kidneys,
Bladder, and Urinary Organs.
It is a powerful and safe remedy,
and is the only one that will
cure the most obstinate cases.
It is sold in bottles of 50 cents
and \$1.00. It is the only
remedy that will cure the
most obstinate cases.
It is sold in bottles of 50 cents
and \$1.00. It is the only
remedy that will cure the
most obstinate cases.

HUNT'S REMEDY

IF YOU SUFFER WITH ALL OTHER MEDICINES
Cure All Diseases of the Kidneys,
Bladder, and Urinary Organs.
It is a powerful and safe remedy,
and is the only one that will
cure the most obstinate cases.
It is sold in bottles of 50 cents
and \$1.00. It is the only
remedy that will cure the
most obstinate cases.

GILBERT'S STARCH

THE GREAT
CATHARTIC.
It is a powerful and safe remedy,
and is the only one that will
cure the most obstinate cases.
It is sold in bottles of 50 cents
and \$1.00. It is the only
remedy that will cure the
most obstinate cases.

NATRONA Bi-Carb Soda

THE GREAT
CATHARTIC.
It is a powerful and safe remedy,
and is the only one that will
cure the most obstinate cases.
It is sold in bottles of 50 cents
and \$1.00. It is the only
remedy that will cure the
most obstinate cases.
