A fire on the coast of New York, on Saturday, Oct. 4, destroyed the steamer "Columbia" at New York. The loss is about \$1,000,000.

One Pure Baking Powder

Life Telling a Secret

A story is told that it is a true story that over seven per cent. of all the baking powders sold contain either arsenic or ammonia, and many of these powders contain both. The ill effects upon the system of food raised by alum or ammonia powders are more dangerous because of their insidious character. It would be less dangerous for the people were it fatal at once, for then food would be avoided, but their baneful action being imperceptible at first and slow in its advances, is less certain. Dr. Price's Cream Baking Powder is declared by all authorities as free from alum, ammonia or any other adulterant. Its purity has never been questioned, and while it does finer and better work, it costs no more than retail than does any of the adulterated powders.
