per ct. difference Royal Baking Powder

Strongest, Purest, Most Economical. Strongest, Purest, Most Economical.

As to whether any of the baking powders are equal to the "Royal," the official tests clearly determine. When samples of various baking powders were purchased from the grocers, and sandyzed by the United States Government Chemists and the Chemists of State and City Boards of Health, the reports revealed the fact that the "Royal," contained from 28 per cent. to 60 per cent. more, leavening strength than the others, and also that it was more perfectly combined, absolutely pure, and altogether wholesome.

As most of these powders are sold to consumers at the same price as the "Royal," by the use of the Royal Baking Powder there is an average saving of over one third, besides the advantage of assured purity and wholesomeness of food, and of bread, biscuit and cake made perfectly light, sweet, and palatable.

The official reports also reveal the presence, in other powders, of alun, lime or sulphuric acid, by which their use is made a matter of grave danger to the consumer.

Whenever a baking powder is sold, either wholesale or retail, at a lower price than the "Royal," It is made from infe-rior ingredients, probably from alum, and is to be avoided under all circumstances.
